CONTENTS OF VOLUME 53 (2017)

Arockiaraj, S. (See Baskar, A. D.)

Baskar, A. D.
F-geometric mean labeling of graphs obtained by duplicating any edge of some graphs vol.53, 107

Dragomir, S. S.
Inequalities for quadratic operator perspective of convex functions and bounded linear operators on Hilbert spaces vol.53, 39

Fujikoshi, Y.
High-dimensional properties of AIC, BIC and C_p for estimation of dimensionality in canonical correlation analysis vol.53, 59

Itagaki, T. (See Koie, H.)

Kertész, D. C.
A generalization and short proof of a theorem of Hano on affine vector fields vol.53, 83

Kida, M.
On two-dimensional Galois representations with squarefree conductor vol.53, 73

Kitada, K.
The existence of universal flat topological connections with discrete structure group vol.53, 1

Koie, H.
On presentations of Hochschild extension algebras for a class of self-injective Nakayama algebras vol.53, 135

Lovas, R. L. (See Kertész, D. C.)

Maeda, R. (See Tahata, K.)

Oeda, K.
Steady-state solutions of a diffusive prey-predator model with finitely many protection zones vol.53, 19

Oka, M.
Remark on the roots of generalized Lens equations vol.53, 127

Sanada, K. (See Koie, H.)

Sudo, Y. (See Kida, M.)

Tahata, K.
Scaled double symmetry model and decomposition of double symmetry for square tables vol.53, 89

Tomizawa, S. (See Tahata, K.)
