

SUT JOURNAL OF MATHEMATICS

Volume 50, Number 2

2014

CONTENTS

Nakao Hayashi and Pavel I. Naumkin*: On the generalized reduced Ostrovsky equation	67
Naoyuki Koike*: Research of submanifolds in symmetric spaces by using the complexification and the infinite dimensional geometry	103
Kouji Tahata and Sadao Tomizawa*: Symmetry and asymmetry models and decompositions of models for con- tingency tables	131
Yasushi Narushima and Hiroshi Yabe*: A survey of sufficient descent conjugate gradient methods for unconstrained optimization	167
Yukihiko Nakata, Yoichi Enatsu, Hisashi Inaba, Toshikazu Kuniya, Yoshiaki Muroya and Yasuhiro Takeuchi*: Stability of epidemic models with waning immunity	205
Takahiro Nishiyama, Masashi Hyodo and Takashi Seo*: Recent developments of multivariate multiple comparisons among mean vec- tors	247
Naoyuki Koike: The complexifications of pseudo-Riemannian manifolds and anti-Kaehler geometry	271
Kouji Tahata, Kouji Yamamoto and Sadao Tomizawa: Wald-type measure of departure from symmetry for square contingency ta- bles with nominal categories	297
Asanao Shimokawa, Yohei Kawasaki and Etsuo Miyaoka: An approach for constructing survival tree based on combination of covari- ates	311

Kazuyuki Hasegawa:	
Twistor holomorphic affine surfaces and projective invariants	325
Iwona Mejza, Stanisław Mejza and Shinji Kuriki:	
Two-factor experiment with split units constructed by a BIBRC	343
Jun-ichi Inoguchi:	
Harmonic maps in almost contact geometry	353
Keiichi Kato and Shingo Ito:	
Singularities for solutions to time dependent Schrödinger equations with sub-quadratic potential	383
Masahito Ohta:	
Instability of solitary waves for nonlinear Schrödinger equations of derivative type	399
Kenta Ozeki:	
A shorter proof of Thomassen's theorem on Tutte paths in plane graphs	417
Jun Fujisawa and Katsuhiko Ota:	
Maximal cycles in graphs of large girth	427
Takahiko Furuya and Takao Hayami:	
Hochschild cohomology ring of a cluster-tilted algebra of type \mathbb{D}_4	439
Nobumichi Shutoh:	
Tail quantile approximations for hybrid lognormal distribution	475
Kazuyuki Koizumi, Takuma Sumikawa and Tatjana Pavlenko:	
Measures of multivariate skewness and kurtosis in high-dimensional frame- work	483
